

Ergonomic Tool Handling with or without Position Control

Perfectly coordinated stand and gantry solutions guide the screwdriving tool securely to the assembly position and take the strain off the operator.

Position control systems ensure that at the right place, at the right time, the correct connection element is assembled to the correct torque.

Tool Handling with Position Control

Optional systems:

- Position control stand PKS
- Position control gantry PKP

Notes:

- Monitoring of the screw position and screw sequence, freely programmable
- Individual screw tightening parameters available for each screw position
- Takes the strain off the operator by absorbing the reaction torque
- Vertical screwdriver guidance
- Optionally with integrated vertical stroke to relieve the operator. The pressure is activated by a cylinder.

Tool Handling without Position Control

Optional systems:

- Linear stands
- Rail-guided torque relief arms
- Parallelogram stands
- Balancers

Notes:

- Takes the strain off the operator by absorbing the reaction torque
- Vertical screwdriver guidance
- Optionally with integrated vertical stroke to relieve the operator. The pressure is activated by a cylinder.

APPLICATIONS

Perfectly coordinated stand and gantry solutions guide the screwdriving tool securely to the assembly position and take the strain off the operator. Position control systems ensure that at the right place, at the right time, the correct connection element is assembled to the correct torque.

Notes

- Monitoring of the screw position and screw sequence, freely programmable
- Individual screw tightening parameters available for each screw position
- Takes the strain off the operator by absorbing the reaction torque
- Vertical screwdriver guidance
- Optionally with integrated vertical stroke to relieve the operator. The pressure is activated by a cylinder.

Functionality

The best process reliability can be achieved with the use of a position control stand/position control gantry which coordinates, optimises and controls the complete production process.

The stand/gantry can be operated with any DEPRAG screwdriving technology.

The position recognition feature increases processing reliability in applications where several screw positions need to be assembled in a certain order on one product. As soon as the position control stand/position control gantry is in the correct position screw tightening will begin. Equipped with guidance hardware and software, the stand/gantry will only allow activation of the correct function once situated in the correct position.

The position control is able to guide inputs and outputs depending on the application. This includes functions such as clamping and locking workpieces, feeding connection elements and activating measurement functions. If there are a large number of screw positions the position control stand /position control gantry can be used to determine and monitor the relevant operating mode required and the order of positions, the screw can only be tightened if the worker has kept the order in the correct sequence.

Control and Visualisation of the Position Control Stand

Advantages:

- Increased process reliability
- Control of processing steps
- Visualisation via monitor
- Integrated electronics into the base stand
- High ergonomics

The integrated electronics provide comprehensive options for control of the assembly process and contain the following components:

- 24V inputs and outputs (for PLC, toolbox and ASTxx)
- HDMI connection for a standard PC monitor
- Ethernet bushing for the integrated web server
- Serial interface for fieldbus module (optional accessories)
- Connections for up to 3 position sensors
- Connection for part sensor
- Full process supervision and operator guidance with status LED in base:
 - green = OK assembly
 - red = NOT OK assembly
 - orange = Power on
 - blue = System ready "screwdriver above correct screw position"

The position control stand can be used with the following operating modes:

- Stand-alone operation with a DEPRAG sequence controller
- Stand-alone operation with a DEPRAG sequence controller with toolbox
- Operation with external controller
- Operation with external fieldbus module

The operator can upload an image of the product and using program creation with “teach mode” each screwdriving position on the image can be indicated by the stand at the actual original positions. Up to 1000 screwdriving positions can be set per program whereas the number of possible programs in operation with the input and output interface is limited to 120 programs and 120 screw positions.

- Operation with MICROMAT-F/MINIMAT-F screwdriver with additional pneumatic controller pc11/pc20
- Operation with external fieldbus module (ProfiBus, ProfiNet, EtherCat, EthernetIP)

Process visualisation

The monitor, used for visualisation of the process, can be connected via the HDMI on the base stand of the position control stand. The monitor gives the operator exact instructions and shows in colour which positions on the product have already been assembled. If the screwdriver mounted on the stand is at the pre-set X-Y coordinate, then this is marked on screen in colour and with a text display “OK” or “NOT OK”. The lit up status LEDs on the base stand also inform the operator of the current status of the screw assembly. The web interface is used for adjustment of the processing sequences where the operator can adjust all settings as well as setting controller configurations.

An additional module “processing display web interface” can also display the current status in quasi real time on the HDMI monitor. This enables assembly processes to be monitored on a remote PC or via smartphone or tablet.

Final values

After each assembly the status is stored in a csv file relating to the screw position. These values can be loaded from the position control stand via the web interface.

Control and Visualisation of the Position Control Gantry

The position control gantry controls and monitors tool positions in manual work stations.

Advantages:

- Increased processing reliability
- Control of process steps
- High degree of ergonomics due to
 - easy access and clear view of the screw positions
 - balancer used to offset screwdriver weight
 - freely accessible material supply from the rear
- High repeatability
- Extreme user-friendliness due to greatly reduced moving masses
- Large and freely accessible working area

The position control gantry functions via a processing and system controller (DCOS).

A DCOS consists of

- the control and operating unit (DPU),
- the control cabinet (DSEC) and
- standardised software modules.

Further details and technical data for the DCOS can be found in our brochure D3350E.

Our technical consultants are happy to help with your configuration.

Software products for position control stand

Software	Description
WEB-VISU-POSI activation key part no. 101890 	<p>Enables additional control and parameterisation of the PKS via an intuitive web interface. The position control stand can be directly integrated into the existing system environment.</p> <p>Number of licenses: 1 License period: unlimited</p>
TIA Link activation key part no. 135839 	<p>Integration in the Siemens programming environment (Totally Integrated Automation (TIA) Portal) is required to operate DEPRAG devices with the current SIMATIC controllers. This integration is quite time-consuming and requires expert domain knowledge of the DEPRAG devices. Therefore, the software TIA link has been created to enable simple integration of the following DEPRAG products: AST11, AST12, AST40 incl. i-versions, AST 6 incl. i-versions, ComCenter 10, position control stand</p> <p>The software not only includes integration in the TIA portal for the above products but also several Quick-Start projects in the “structured text” programming language without first setting up communication using the user manual.</p> <p>The software TIA Link presents a significant time saving due to considerably reduced programming efforts.</p> <p>As well as the fieldbus connection, there are additional examples provided for controlling the screwdriving system. The following SIMATIC controllers are supported: SIMATIC S7-1200, SIMATIC S7-1500 and SIMATIC ET 200SP (CPU)</p> <p>Number of licenses: 1 / License period: unlimited</p>
TwinCAT Link activation key part no. 140996 	<p>Integration in the Beckhoff programming environment is required to operate DEPRAG devices with the current Beckhoff controllers. The software TwinCAT Link has been created to enable simple integration of the following DEPRAG products: AST11, AST12, AST40 incl. i-versions, AST 6 incl. i-versions, ComCenter 10, position control stand</p> <p>The software not only includes integration for the above products but also several Quick-Start projects in the “structured text” programming language which enable immediate execution of screw assemblies without first setting up communication using the user manual. The Quick-Start projects are available for version TwinCAT 2 as well as version TwinCAT 3.</p> <p>The software TwinCAT Link presents a significant time saving due to considerably reduced programming efforts.</p> <p>As well as the fieldbus connection, there are additional examples provided for controlling the screwdriving system. The following Beckhoff software systems are supported: TwinCAT 2 and TwinCAT 3</p> <p>Number of licenses: 1 / License period: unlimited</p>

Optional software modules for position control stand and for position control gantry when using the DEPRAG controller system DCOS

DVIP50 part no. 815629 DVIP100 part no. 815630 DVIP200 part no. 815631 	<p>DVIP – DEPRAG Vision and Position</p> <p>The extension package DVIP is required if positioning control is needed for a position control stand/portal or actions should be initiated via the screwdriving position (e.g. allocation of various tools via toolbox, etc.). The package is not available for the DPU010(C).</p> <p>Application examples Position stand, position gantry, XYZ screwdriving systems (DCAM)</p> <ul style="list-style-type: none"> - Position controlled parameter selection - Position controlled tightening sequence - Product and process visualisation
DAST100 part no. 815641 DAST200 part no. 815642 	<p>DAST – DEPRAG AblaufSteuerung</p> <p>The extension package DAST is the software panel for EC and EC-Servo systems. DAST is used to supervise the operation and visualisation of the screwdriver sequence controller through the system control.</p> <p>Application examples AST data processing AST data analysis AST data display</p>

Our software solutions undergo continuous improvements. We recommend that you regularly update your software. In this way you will always receive the most up-to-date security updates, upgraded features and drivers. With the most current version of the software you can be sure that your device is optimally prepared for Industry 4.0. **The order number for the update of the position control stand is: 119657.**

For more details to the software products, please see brochure D3900E.

Linear stand – for ergonomic and process reliable tool guidance

Advantages:

- user friendly
- ergonomic
- support of the tool weight
- fast and secure positioning

DEPRAG linear stand for ergonomic process reliable guidance of your tool, used to support the tool weight and for fast and secure positioning.

Please contact us if you require a special linear stand for e.g. ceiling suspension, with longer extension or with locking mechanism.

Technical data – Linear stand

For torque reaction up to Nm / in.lbs	Working area A mm/in.	Pullout s mm/in.	Grid dimension R mm/in.	Column-Ø D mm/in.	Height h mm/in.	Height H mm/in.	Weight of hori- zontal arm kg/lbs	Part no.

for ESD screwdriver, straight								
20 / 177	217-329 / 8.5-12.8	242 / 9.4	28 / 1.1	20 / 0.78	135-1102 / 5.3-43	1240 / 48.36	2 / 4.4	408010D
50 / 443	222-348 / 8.6-13.6	342 / 13.3	42 / 1.6	30 / 1.17	205-1034 / 8 -40.3		6.7 / 14.7	408010F

Required accessories: balancers (see page 15) and screwdriver adapter or V-mounting bracket (see pages 16/17).

Optional equipment for linear stand

Designation	Part no.	Suitable for	Weight kg/lbs	Note
Horizontal draw back	379822N	Linear stand no. 408010A	0.5 / 1.1	
Horizontal draw back	379822L	Linear stand no. 408010B	1 / 2.2	
Horizontal draw back	379822M	Linear stand no. 408010C	1 / 2.2	
Clamping unit with cylinder incl. start button	on request	Linear stands		takes up the contact pressure of the screwdriver and relieves the operator
Clamping unit vertical	on request	Linear stands		the clamping unit is only used in combination with the DEPRAG FEED MODULE (DFM) or the ERGOMAT-Z screwdriver

4002971

Please consider both the weight of the horizontal arm and of the screwdriver in order to select the appropriate balancer. We highly recommend the use of two balancers to spread the total weight more evenly. We recommend the use of linear stand 408010B for tools with total length ≥ 450mm and for screwdrivers size 2 in conjunction with our feeding systems.

Parallelogram stand - for screwdriver, straight

for torque reaction up to Nm/in.lbs	Capacity kg/lbs	Working area mm/in.	Height max. mm/in.	Part no.
45 / 400	0-2 / 0-4.4	150-610/5.85-23.8	600 / 23.4	406253A

Required accessories: Screwdriver adapter or V-mounting bracket (page 16/17).

Parallelogram stand with adjustable starting position, spring loaded.

Additional swivel-arm - for parallelogram stand 406253A

Working area mm/in.	Part no.
250 / 9.75	347607
400 / 15.6	811733A

Rail-guided torque relief arm

maximum torque 20 Nm - for screwdriver in straight version and pistolgrip

Designation	Part no.	consisting of position
Parallelogram arm consisting of: parallelogram arm, guide carriage, lateral stop and elevation stop (our recommendation as minimum standard equipment)	809926A	2/3/4/9
Required accessories for this:		
Guide rail, length 1 m / 2 m / 3 m	8099151/8099152/8099153	5
End stop (is required twice)	809911	1
Optional variants and other attachments		
Parallelogram arm consisting of: parallelogram arm and guide carriage	809926B	4/9
Parallelogram arm (without attachments)	on request	9
Elevation stop	809913	3
Lateral stop (functions only in connection with elevation stop)	809912	2
Telescope holder	809907	6
Guide carriage (separate), with aluminium plate 100x100x20 mm	809910	8
Suitable screwdriver adapter	see page 16	7

Please find further information on page 12.

WITHOUT POSITION CONTROL

Further information about the rail-guided torque relief arm

The rails are available in 1, 2 and 3 meter long pieces (3.3 ft., 6.6 ft. and 10 ft.). 3 meter long pieces (10 ft.) can be joined together. If the rails are installed high above the work station, the telescope holder should be used.

An angle larger than 60° between the rails and the parallelogram arm should be avoided, since it will result into sluggish positioning. Furthermore, it may also cause the guide carriage to move when reaching torque.

Swivel-arm for table installation

Track profile C-rail 30 x 32 mm

Length (L) mm/in.	Capacity (P) kg/lbs	Part no.
630 / 24.57	16 / 35.2	811600A
1000 / 39	10 / 22	811627A

Additional swivel-arm

Track profile C-rail 30 x 32 mm

Length (L) mm/in.	Capacity (P) kg/lbs	Part no.
630 / 24.57	16 / 35.2	811601A
1000 / 39	10 / 22	811630A

WITHOUT POSITION CONTROL

Swivel-arm for wall installation

Track profile C-rail 30 x 32 mm

Length (L) mm/in.	Capacity (P) kg/lbs	Part no.
630 / 24.57	20 / 44	811602A
1000 / 39	16 / 35.2	811731A

All swivel-arms are delivered with extended high arm tips. Through dismantling of a cone plate the arms can be set horizontally.

Balancer stand

for screwdriver straight (motor size 0)

Capacity kg/lbs	Working area mm/in.	Height mm/in.	Part no.
0.2-0.26/0.44-0.57	540-640 / 21-25	750 / 29.25	324348H
with maintenance unit and vacuum interruption for screw suction *)

	2	367300A
MINIMAT, pistol grip	2.5	367300B
	3	367300C
		
screwdriver adapter, part no. 367300E		
Suitable for screwdriver style	Motor size	Screwdriver adapter, turnable - special version, Part no. for screwdrivers in conjunction with feeders only - in tight and badly accessible locations (please find picture on page 18)
MINIMAT	1	401014A
	2	401014B
	2.5	401014D
	3	401014C

Designation	Suitable for	Part no.	Picture
V-mounting bracket all-purpose applications	all tools upto a max torque of 1 Nm	4008331E	bracket range dia. 16.5-36 mm/0.64-1.4 in.
	all tools upto a max torque of 20 Nm	400833E	bracket range dia. 20 -54 mm/0.78-2.1 in.
	all tools upto a max torque of 40 Nm	4008331R	bracket range dia. 43 -64 mm/1.7 -2.5 in.
Adapter, turnable 45° and 90°	all screwdriver adapter (not for 400833K)	400833P	
Support ring	pneumatic screwdrivers, straight with push-to start (not for screwdrivers in conjunction with feeders) motor size 1 / motor size 2 / motor size 3	3870321 / 389775A / 398704A	
Pistol grip	MINIMAT-EC screwdriver, straight series 320EGA22-../320EGA27-.. series 320EGA36-..	4055451E 4055452D	
	MINIMAT-ED screwdriver, straight series 330EG36-00..	4055452D	
	pneumatic screwdrivers, straight, in conjunction with feeder motor size 1 (ERGOMAT, type 347V-..) motor size 1 (MINIMAT) motor size 2 (MINIMAT) motor size 2.5 (MINIMAT)	4055451A 4055451I 4055452B 4055451C	
Foam rubber grip	pneumatic screwdrivers, straight (not suitable for ESD screwdriver, screwdriver in conjunction with feeder and screwdriver with lever-start) motor size 0 / motor size 1	833058 / 821702	
Handle	MINIMAT-EC screwdriver, straight series 320EGA36-..	415795	 handle for EC screwdrivers
	MINIMAT-ED screwdriver, straight series 330EG36-00..		
	pneumatic screwdrivers, straight motor size 1 (also in conjunction with feeder) motor size 2 motor size 2.5 motor size 2.5 in conjunction with feeder motor size 3	354660B 328536L 360749 3607491 328756A	
	pneumatic screwdrivers, pistol grip motor size 2.5 (also in conjunction with feeder) motor size 3 (also in conjunction with feeder) motor size 4	3607493 4109711 4109711	

Screwdriver adapter, not turnable, standard version
for screwdriver in angle head design,
part no. 400833N/L

Screwdriver adapter, turnable,
standard version for screwdriver in
pistol grip design,
part no. 367300A/B/C

Screwdriver adapter, turnable,
standard version,
part no. 367300D

Screwdriver adapter, turnable,
special version,
part no. 401014A

Stand-alone operation with DEPRAG sequence controller without toolbox

Position control stand PKS

■ Note: part sensor is required!

Stand-alone operation with DEPRAG sequence controller and toolbox

Position control stand PKS

■ Note: part sensor is required!

Operation with external controller

Position control stand PKS

- Screw position evaluation: via PKS
- Screwdriving program selection: via external controller
- Number of programs restricted to 120
- Note: part sensor is required!

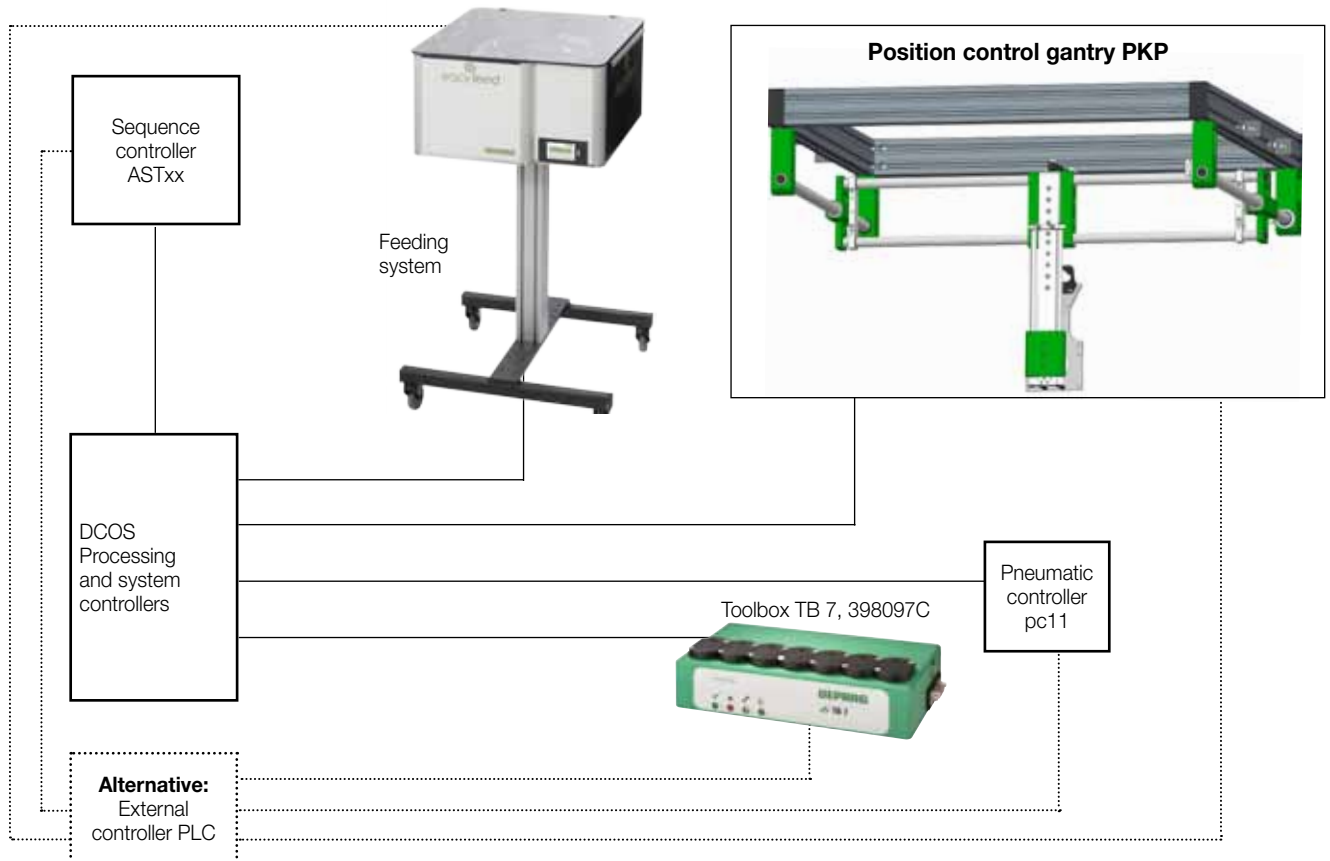

Operation with external fieldbus module

Position control stand PKS

- Screw position evaluation: via PLC
- Screwdriving program selection: via PLC

Please consider both the weight of the horizontal arm and of the screwdriver in order to select the appropriate balancer.
We highly recommend the use of two balancers to spread the total weight more evenly.

- The position control gantry functions via a processing and system controller (DCOS)
- A DCOS (DEPRAG Controller System) consists of
 - the control and operating unit (DPU)
 - the control cabinet (DSEC)
 - standardised software packages
